

Knauf Firepaint Thinner EP

B151e.en Knauf Firepaint Thinner EP

Product description

Knauf Firepaint Primer K2 is produced and supplied in such a way that thinning is normally not necessary provided the paint is properly mixed/ stirred.

However, if the paint is to be applied in a low film thickness (for instance as a "sealer coat") or if the paint has become too thick, e.g. in cold weather, the Knauf Thinners indicated on the product data sheet may be added to obtain a consistency most suitable for application. As a general rule, thinning should be kept at a minimum as the quality of the paint work will suffer from too liberal thinning. However, if application is to take place at high temperatures (air and/or steel), thinning may even beyond the limits mentioned on the data sheets exceptionally be necessary in order to avoid dryspray and poor film formation. Storage Store in a well-ventilated place.

Method of delivery Knauf Firepaint Thinner EP bucket 5l

article no 528825

Scope of application

General purpose thinner for Knauf Firepaint Primer K2 qualities. Safety Handle with care

Handle with care. Before and during use, observe all safety labels on packaging and paint containers, consult Knauf Safety Data Sheets and follow all local or national safety regulations. Knauf Firepaint Thinner EP for professional use only
